

AMTIL: 21 March 2019

Australian Manufacturing
Technology Institute Limited

AUSTECH 2019 – Spotlight on specialist technologies

Austech has always provided a comprehensive showcase of the latest innovations across every category of advanced manufacturing technology, and that tradition will continue at this year's show, with two dedicated areas focusing on specialised technologies – the Digitalisation/Industry 4.0 Pavilion, and the Air Technology Pavilion.

Having made its debut two years at Austech 2017, the Digitalisation Pavilion will again explore the latest technologing developments at the cutting edge of manufacturing today. With the industry entering a new phase of rapid, radical change, often described as the Fourth Industrial Revolution, breakthrough advances in fields such as robotics & automation, interconnected devices and the Internet of Things, big data and Cloud computing are ushering in the era of the smart, connected factory.

Amid ever-accelerating rates of technological change, and ever-growing competition, it is vital to not get left behind. The Digitalisation Pavilion will provide a snapshot of how the latest smart technologies are changing the very basis by which products are manufactured today, while offering insight into how these changes can benefit you and your business.

Meanwhile the Air Technology Pavilion is a new section of the Austech exhibition, focusing on the latest state-of-the-art compressor equipment and associated air technologies. Encompassing compression technologies, air treatment and filtration systems, vacuum pumps and piping, as well as software applications and support services, the Air Technology Pavilion will offer a far-reaching showcase of a technology category that is vital to so many modern manufacturing businesses.

“At Austech we've always strived to ensure we cover the entire spectrum of manufacturing technologies,” says Kim Banks, AMTIL's Events Manager. “And we believe that grouping specific categories in dedicated areas is very helpful both to the exhibitors and to visitors at the show. The Digitalisation Pavilion was a great success two years ago, and we've always hoped to be able to focus in more depth on compressors and air technology, so we think these two Pavilions will be a very exciting feature of Austech 2019.”

Companies who are interested in exhibiting at Austech 2019 should contact AMTIL on 03 9800 3666 or by emailing AMTIL's Events Manager Kim Banks on kbanks@amtil.com.au. If you would like to attend Austech 2019, please register online at:

About AMTIL

The Australian Manufacturing Technology Institute Limited (AMTIL) is the peak national body that represents the interests of manufacturing technology suppliers and users within the precision engineering and advanced manufacturing sector. Since its establishment in 1999, AMTIL has engaged in a range of initiatives aimed at supporting and promoting the industry in Australia. These include: Austech, Australia's premier advanced manufacturing and machine tool exhibition; the industry-leading publication AMT Magazine; and an array of other services for its members.
