

Industry 4.0 Digital Shipyard, United States

16 – 21 September 2018

Applications are now open for Victorian manufacturing companies to attend the Industry 4.0 (Digital Shipyard) Global Discovery Exchange to the USA from 16 to 21 September 2018.

Victorian companies will visit cutting-edge manufacturing businesses to help them benchmark against global leading practice and experience new technologies.

The Exchange will explore Industry 4.0 technologies through the lens of digital shipyards. Visits to major US submarine and shipbuilding companies who have implemented digital manufacturing principles and technologies will demonstrate how the adoption of new or improved technology and processes could benefit Victorian manufacturers. The Exchange will also endeavour to demonstrate how suppliers to these digital shipyards have adapted to, and are currently working with and delivering to these digital based manufacturing facilities.

Dates: 16 to 21 September 2018
Applications close: 31 July 2018

For further information about the Exchange, contact Matthew Wood on (03) 9651 9012 or matthew.wood@ecodev.vic.gov.au
