ENGINEERED SOLUTIONS FOR MISSION CRITICAL ASSET PROTECTION

OSAAP Australia delivers precision-engineered CNC foam cut-outs for critical military applications. Using advanced software and top-quality materials, we create custom solutions that protect and organise sensitive equipment, from weapons to missile systems, ensuring safety, efficiency and reliability in defence operations.

CAPABILITIES

- **Bespoke Manufacturing:** Customised CNC foam cut-outs ensure optimal functionality and integration with military systems.
 - **Deployable Design Management:** Readily deployable equipment for on-site design adjustments.
 - **Rapid In-House Execution:** Fast, secure, and precise in-house design and production.
 - **Laser-Etching for Serialisation:** Provides precise traceability for compliance and quality control.
 - **Laser-Etching for Branding:** Precisely embeds logos on materials for customisation.
-
- **Foams:** Pure nitrogen-infused, non-leeching for weapon cases, ESD protective, ordnance-specific for weapons transportation and missile cradling.
 - **Cases:** Engineered for military applications, ensuring robust protection and precise fit.

DISCRIMINATORS

- **Foams** meet the **MODUK DEF STAN 81-116** standard for military-grade packaging protection.
- Platinum Dealer of **Pelican® Cases**.
- **Blue Shadow®** software, purpose-built for **precision design**.
- **Blue Manager®** project management tool with real-time collaboration, full traceability, and manufacturing management for seamless design to production
- **Deployable design system** keeps customer equipment secure on their premises throughout the process.
- Part and order **specific barcoded foam** inserts enable easy tracking and traceability.
- **Scalable and flexible** manufacturing.
