

CAPABILITY STATEMENT

2022

COMPANY OVERVIEW

When it comes to expert insulation services, Therma-Safe Insulation Industries has built an impeccable reputation over 20 years of loyal service. A small company but big on quality and trustworthiness, Therma-Safe had a recent change in management which has brought new energy to a distinguished business with an outstanding track record in fabricating, installing, repairing and maintaining thermal and acoustic insulation.

We are your go-to for all sheet metal, cladding and cryogenic work and have experience with CNC machining. We cater to a diverse range of industries, small to large scale, throughout metro and regional Victoria, as well as interstate. Our clients include key players in energy, oil/gas and petrochemical, through to pharmaceutical, dairy, food and water supply.

At Therma-Safe Insulation Services, we pride ourselves on providing hands-on, end-to-end, innovative solutions, from the quoting process through to fabricating, fitting and maintenance, capped by friendly, reliable advice and service.

OUR PURPOSE

When you partner with Therma-Safe, you're assured of personal service and a single point of contact. We know our customers and understand their needs.

A commitment to excellence and quality is integral to every project we undertake, regardless of scale and irrespective of challenges. We do the job right the first time, and our reliable, accountable ethos leads to strong working relationships with clients.

When you contact Therma-Safe, be assured of a quick response and when you need after-hours support, we're there.

Clear communication, friendly advice and an accommodating mindset backs our guarantee of quality end-to-end service.

OUR SERVICES

For all sheet metal and industrial insulation needs, you're assured of outstanding, end-to-end service with Therma-Safe. Our expertise ranges from heating, steam and cooling services to acoustic insulation to block sound transmission. Insulation provides a physical barrier, guarding against corrosion and mould, heat gain/loss and freezing.

Our thermal insulation covers are customised, easy to remove jackets, sewn to fit pipes, ducting and pumps to ensure liquid products are safely transported, workers protected, costs lowered and waste reduced. Committed to the highest quality materials and safety

standards, Therma-Safe is built on a strong platform of industry knowledge and understanding.

All work is scheduled through our sheet metal shop.

We happily provide on-site quotes, recommendations and advice, always without judgement.

Our range of cost-effective insulation solutions are guaranteed to lower running costs, reduce heat waste and provide essential protection for site workers.

INDUSTRIAL HEATING PIPES

Throughout food and chemical industries, heating, sterilising and processing are essential. Our insulation ensures uniform heating, preventing water and other liquids from solidifying.

CHILLED WATER PIPES

Food, laboratory and medical fields must transport liquids at extremely low temperatures, plus cool manufacturing parts and machinery. Our solutions reduce energy/heat loss and evaporation, plus stop pipes from freezing.

STEAM + CONDENSATE PIPES

Safely carrying pressurised steam from boilers to working components is key to power generation and industrial heating. Our solutions reduce costs, heat and waste loss while providing critical workplace protection.

INDUSTRIES WE SERVE

The list of industries which rely on safely transporting water and liquid products, cooling manufacturing parts, heating, sterilising and processing is comprehensive. We support businesses and infrastructure large and small.

- ✓ Oil and gas
- ✓ Energy
- ✓ Power
- ✓ Engineering
- ✓ Food
- ✓ Dairy
- ✓ Refrigeration
- ✓ Health
- ✓ Medical
- ✓ Pharmaceutical
- ✓ Tank storage
- ✓ Wastewater treatment
- ✓ Petrochemical and chemical

With unrivalled expertise and understanding of sheet metal and insulation needs, Therma-Safe can ensure your tanks and pipes continue to operate effectively and your people remain protected.

- ✓ Cert IV (Competitive Manufacturing)
- ✓ CNC machinery
- ✓ ISO accreditation
- ✓ Full trade qualifications
- ✓ Safety training
- ✓ Computer and technical skills

ACCREDITATION AND EXPERTISE

The list of industries which rely on safely transporting water and liquid products, cooling manufacturing parts, heating, sterilising and processing is comprehensive. We support businesses and infrastructure large and small.

We are more than just an experienced, fully qualified team – at Therma-Safe, be assured you will get exactly what you asked for, at the price you were quoted.

OUR CLIENTS

Therma-Safe's growing list of clients include key Victorian and interstate players across a range of industries and size. We have a proud history of teaming with local businesses as well as large-scale projects in the gas, energy and water sectors.

We have partnered with the likes of Lochard Energy (Iona Gas Plant), Saputo Dairy Australia, JC Butko Engineering, Hexion Chemical, Orica, and Austral Bricks. With an accommodating attitude, we welcome challenging jobs and happily travel to where you are.

All our insulation and sheet metal work is cost efficient, lowers waste, keeps staff safe and as a rare female-owned enterprise in the industry, we pride ourselves on empathy and strong working relationships with suppliers.
